Who Is Sitting Where?

There are four students in the same classroom that will be sitting in the same row. However, the teacher will not let certain students sit next to each other. Rachel is sitting next to Mita, but not next to Jared. If Jared cannot sit next to Aaron, who is sitting next to Aaron? Who is sitting next to Aaron and where are Rachel, Mita, and Jared sitting?

Make sure you include an explanation along with your answer. State the order in which the students are sitting AND tell me who is sitting next to Aaron. Did you know that an inch of rain is equal to 10 inches of snow?
