Let’s Go Shopping?

Christian and Erik decided to go shopping. They had $200 with them. They spent \(\frac{1}{5}\) of their money on video games, $70 on shirts, and 20% of their original money on food. How much money do Christian and Erik have left? Don’t worry about tax. Don’t forget to give your first and last name when you submit your answer.

Make sure you include the answer and an explanation as to how you determined the correct response. Show any mathematical calculations you used to figure out the answer. March will be an excellent month to view Saturn. Did you know that Saturn has at least 60 moons, and Titan the largest one, can be seen with any telescope?
