Pidgin	IM/Chat Client	No	Freeware	No Change
Epson Projector Utility [10]	Epson NS Connection	No	IMSA Site License	No Change

[1]   Microsoft OneNote 2007:

- This software application is used extensively in some class at IMSA.
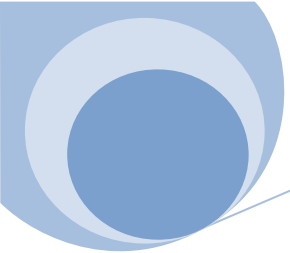

- Some computer manufactures provide a license of this application with their computers and others do not. In the case where a computer manufacture does not include OneNote 2007 with their systems a license will be provided via IMSA's site license. Under that circumstance OneNote 2007 must be removed from the student's computer once the student graduates or is otherwise is no longer enrolled as a student at IMSA

2   Microsoft Expressions Web:

- This software application is required by teachers in the Social Sciences department.

3   Mozilla FireFox

- This software application is the preferred/recommend web browser for the IMSA community.

4   Adobe Photoshop Elements

- This software application is required by teachers in the Social Sciences department.

5   Adobe Photoshop Elements Licensing

- This software application MUST BE purchased by the parent and student.

- Due to limitations in Adobe's site licensing agreements IMSA is unable to provide students with a license to use Adobe Photoshop Elements on their personal computer. One exception, if a student/family applies and is approved for a Scholarship Loaner Tablet PC for the school year IMSA will provide a license of Adobe Photoshop Elements as a part of the Scholarship Loaner Tablet PC. We can do this because the computer it is being installed and used on is an IMSA owned Tablet PC and not a student owned Tablet PC.

6   Mathematica

- This software application is required by teachers in the Mathematics department.

7   Mathematics/Programming Language Tools

- These software applications are required or will be helpful to students participating in Mathematics/Computer Programming classes at IMSA.

8   Logger Pro
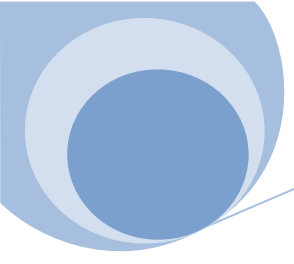

Revision: May 17, 2010

- This software application is required by teachers in the Science department.

9   Symantec AntiVirus

- IMSA IT Policy requires all computers connected to the IMSA network must have IMSA approved AntiVirus software installed and properly configured.

10   Epson Projector Utility

- Software used to access Epson projectors in IMSA classroom for the purpose of presenting material to classmates, teacher and out side visitors
