

VISION 2033

Elevating IMSA Everywhere

We will execute the following Master Plan and stay true to the IMSA mission and our core pillars. We will choose options that prioritize equitable outcomes, distinguished student experiences, and responsive measures so all students can be ignited and nurtured.

BUILD

curricular and lab space capacity on the Aurora campus to support the growth and experimentation of artificial intelligence and its applications.

REINVENT

the residential life experience with new facilities and social and mental health resources to support a meaningful development experience on campus.

CONSTRUCT

new IMSA diplomas that offer broader pathways to experience IMSA.

DEVELOP

IMSA innovation hubs around the state, including online, so that more students seeking enrichment in STEM can access IMSA and its pre-enrollment programs.

FORMULATE

partnerships in higher education and industry to expand access opportunities for IMSA students around the state.
